### A MESSAGE TO OUR VALUED CUSTOMERS

Thank you for choosing PETKIT PURA X Self-cleaning cat litter box. We at PETKIT have done our best to make life easier for you and your pet through the inside of technology. Before using this product, please carefully read the user's manual. By setting up and using this product, you acknowledge that you have already read and accepted the safety measures listed below. We are not liable and will not accept responsibility for any accidents or injuries that result from improper use of this product. Concerning this notice, we reserve the rights of interpretation and revision.

### USER SAFETY GUIDE

- Failure to follow the safety measures outlined below can result in product malfunction or other unforeseen mishaps.
- Please install and use product exactly as instructed in the User's Manual.
- This under the age of 18 months should not use this product.
- For indoor use only. Do not expose product directly to sunlight for extended periods of time. Do not place near an open flame.
- Even though this product uses low current, pets can still damage the power cord if they chew on it, preventing the product from getting power. Please ensure pets use product as intended.
- Only use the provided power adapter. Using a different power adapter may result in damage to the product or potential safety hazards.
- Make sure the product remains parallel to the ground, otherwise the concentrated purifying liquid may pour out and cause product malfunction.
- Do not allow the bottom half of the product to be dipped or submerged in water.
- Repairs should be done under the guidance of a professional to avoid safety hazards.
- When leaving for a long period of time, make sure there is enough space in the waste collection bin.
- If you encounter any problems while using this product, please contact us immediately.

### FUNCTIONS

- Secure - 8 Levels of Safety
  - Thermal sensor: The product will suspend if the cat enters.
  - Infrared sensor: The entrance is equipped with an infrared sensor that will halt product operation if it detects a cat nearby.
  - Weight sensor: The entrance of the litter box is equipped with weight sensors. If a cat enters the litter box, these sensors will detect the cat and cease the operation.
  - Anti-pinch infrared sensor: There are two pairs of infrared sensors installed on the bottom inside the litter box. While the product is operating, if a cat approaches, the device will immediately cease the operation.
  - Speed Detection Remote Alerts: Use the APP to get remote updates and early alerts of abnormal activity.
  - Accident Protection System: Sensors system will be activated before operating. The product will shut down and send an alert if any of the sensors malfunction.
- Multiple types of cat litter: The cat litter filter net is effective at filtering both clump litter and non-clumping litter, such as pine, paper, silica, and clumping litter. It is also effective at filtering both clump litter and non-clumping litter, such as pine, paper, silica, and clumping litter.
- Antibacterial Odor Removal Using the Odor-Removal Device and Concentrated Purifying Liquid: Through experimental analysis, this product has proven to be effective at removing unpleasant odors and harmful germs and can help improve the air quality of your home.

### PACKING LIST

### PRODUCT DESCRIPTION

### PRODUCT DESCRIPTION

### SCAN THE QR CODE AND WATCH THE SET UP VIDEO

### TAKE OUT CYLINDER

- Unlock the cylinder that holds the concentrated purifying liquid. Press the release button for the cylinder in a clockwise direction. The release button is located on the end of the cylinder on the back of the litter box. If the covering has not already been removed from the litter box, make sure to remove it by sliding it off before taking out the cylinder.
- Use both hands to lift upward as picture instructed.

### ADD THE PURIFYING LIQUID

- Remove the orange silicone lid of the odor-removal device and pour the entire bottle of concentrated Purifying Liquid into the odor-removal device.
- Reseat the silicone lid to the odor-removal device.

### INSTALL THE CYLINDER AND POUR IN THE LITTER

- Use both hands to lift upward, reinstall the cylinder into the back of the litter box.

### INSTALL THE CYLINDER AND POUR IN THE LITTER

- Pour the cat litter into the opening in the cylinder. The amount of cat litter should not exceed the MAX Line indicated inside the cylinder.

### REPLACE THE LITTER BOX COVER

- Rotate the locker counterclockwise which is located on the back of cat litter box.
- Place the cover back on the litter box. (The PETKIT logo should face the front opening of the litter box once the cover is placed properly.)

### INSTALL THE TRASH BAG

- Make sure you install the trash bag correctly and flatten out the edges of the bag. Otherwise, it may influence the ability of the device to sense the amount of urine in the litter box.
- Take out the entire waste collection bin.
- Open trash bag all the way up, and hang it from the four trash bag hooks located on the waste collection bin.
- Place on the trash bag ring to secure the trash bag in place and put the waste collection bin back into the bottom of the litter box. When placing the trash bag ring, make sure the front of the trash bag ring is facing forward.

### INSERT THE LITTER PAD

Spread out the litter pad and place the two front legs of the litter box in the left and right leg holes of the litter pad. If this step is not done as instructed, it may render the liquid detection function of the odor-removal device ineffective and influence the overall lifespan of the odor-removal device. The orange area on the litter pad is the effective range of the thermal sensor. Once the cat enters this area, it will be recognized by the sensor, and the device will automatically cease operation.

### PLUG IN THE POWER CORD, START USING

Take the cord adapter and attach it to the lower dot on the back of the litter box, which is near the bottom. Then plug into a power socket.

### USE THE APP

- Scan to download the PETKIT APP. After registering in the APP, follow the prompts to your account to your PETKIT Smart Automatic cat Litter Box.
- Use the App to get real-time information and notifications about cat's weight, as well as time and frequency of using the litter box. Automatic cleaning and periodic cleaning can only be accessed through the APP.

### MENU

Short press the menu button to navigate the menu. The screen will display different functions to choose from. Short press OK to choose a function.

### DISPLAY GUIDE

Network status, Times of use in each day, Percentage of remaining cat litter, The weight of the cat, Clean now, Periodic cleaning, Evenly distribute cat litter, Barrel not lock, Is in the litter, Figure the network.

### SCAN THE QR CODE AND WATCH THE CLEAN UP VIDEO

### PRODUCT CLEANING

Remove cylinder periodically for cleaning. It is recommended to wait until the level of kitty litter has gone below the "Empty Litter Line" before removing the cylinder for cleaning.

### FAQ

Why do rollers rotate when I don't perform any operation? The machine automatically detects the position between the rollers and returns them to the original positions. Why does it show prompt that the lid is not placed when I put the lid on the main unit? Check whether the upper lid for the main unit is correctly placed. Why do the rollers stop working when I move? When sensors system detects nearby moving subjects, it will shut down the operation for safety. Why is the display screen off? The display screen will enter the screen protection mode with a dynamic PETKIT logo when the product is not operating for a period of time. The screen will also be turned off when the App shuts it down. You can also modify the brightness level.

### ABOUT PETKIT CONCENTRATED AIR PURIFYING LIQUID

The following data comes from the third-party detection institution: Under the experimental conditions, the product reaches the actual non-toxic grade after acute oral toxicity test according to Version 2002 standard of disinfection technology standard. It is of actual non-toxic grade after acute inhalation toxicity test: Under the experimental conditions, the inhibition ratio against escherichia coli, staphylococcus aureus and candida albicans of the product is >99% pursuant to GB 15979-2002 standard; Under the experimental conditions, the inhibition ratio against common germs such as aspergillus niger, moldaxia fulva, salmonella typhimurium and klebsiella pneumoniae of the product is >99% in line with QB/T 2738-2012 standard; Under the experimental conditions, the bactericidal rate against staphylococcus albus of the product in the mermer space reaches to 79% per GB 21511-2010 standard; Under the experimental conditions, the removal efficiency of the product against common indoor pollutants (including ammonia and formaldehyde) is >80% pursuant to QB/T 2761-2006 standard.
